

TEKNOCLAD 3370 / 3371

DIRECT-TO-WOOD, WATER-BORNE COATING FOR CLADDING

FASTER PRODUCTION FOR CLADDING

This one-can product is a primer, intermediate and topcoat, all in one. With fewer coating layers required, cladding production is faster and costs are reduced.

The coating is applied direct-to-wood and is suitable for all wood species. Its block resistance is excellent so your products move faster through the manufacturing process.

OPTIONS FOR APPLICATION

The TEKNOCLAD range is suited to both spray and brush machine application, as well as vacuum and brushing by hand. For spraying choose TEKNOCLAD 3370. For application by brush machine choose TEKNOCLAD 3371. Adhesion and levelling properties are very good in both products.

COLOURS THAT LAST

Opagues and translucent are tintable in any colour so your customers are sure to find a shade they like. The opaque shades have strong hiding power and the translucent product displays high transparency through the coating.

Available in semi-matt gloss level 20.

MAIN FEATURES

Primer, intermediate, topcoat all in one can

Direct-to-wood application

Excellent block resistance, adhesion and levelling

Available in gloss level 20

High transparency through translucent coatings

Wide choice of application methods
